VIROON LANGKAEW

Third-year Information Technology and Data Science student seeking a Cooperative and Work-Integrated Education (CWIE) internship in software development. Strong interest in full-stack development, React-based application design, and backend system implementation. I am motivated to apply academic knowledge to real-world projects and gain practical experience with modern software engineering practices.

TECHNICAL SKILLS

Programming Languages : Java, C++, Python, HTML/CSS, JavaScript
Frameworks & Libraries : React, Django (Python), RESTful API Development
Database Management : MySQL
Tools : VS Code, Git/GitHub
Design : Canva

EDUCATION

Burapha University, Chanthaburi Campus

B.Sc. in Information Technology and Data Science

2023 – Present

GPA: 2.56

LANGUAGE

Thai: (Native)

English : (Basic)

EXPERIENCE

PROJECTS

Online Clothing E-Commerce Platform (Individual Project)
February 2026 – March 2026

- Developed a full-stack e-commerce web application utilizing React (Vite) for the frontend and Node.js (Express) for backend services.
- Implemented secure Authentication and Role-Based Access Control (RBAC) using JWT, managing distinct permissions for Admin, Seller, and Customer roles.
- Leveraged React Context API for efficient global state management, including persistent shopping cart functionality and user session handling.
- Designed and architected a relational database schema on Aiven Cloud (MySQL), managing complex data structures for users, shops, products, and order histories.
- Successfully deployed the production-ready system using Vercel (Frontend) and Render (Backend) to ensure global 24/7 availability.
- Technologies Used: React, Node.js, Express.js, MySQL (Aiven Cloud), JWT, Tailwind CSS, Axios, Vercel, Render.

PROJECT SCOPE

- Initial load delay of ~1 minute due to Render's free tier sleep mode.
- Uploaded product images are cleared whenever the server restarts.
- Core ordering functionality is simulated without real-world payment integration.
